Who We Are

At En Pointe IT Solutions, we're all about harnessing the right technology to drive optimal results for your business. Whether you are seeking growth, new customers, trying to reduce costs or improve efficiency — whatever your business goals, En Pointe IT Solutions has the expertise to find you the right technology solution.

Our team of seasoned technology sales and technical specialists will guide you through the maze of technologies available today, and work to develop and deliver the best solution for your business. The strategy of partnering with En Pointe IT Solutions is based on our ability to provide the scale of a large technology supplier, tier-1 vendor certifications and best-in-class logistics, all while maintaining the availability of a local partner.

En Pointe IT Solutions makes IT work for you:

- We provide personalized account management
- We bring engineering resources for the desktop to the data center
- We simplify technology for our clients

We present you with the unique opportunity to leverage a hybrid IT solution offering both the economy of scale advantage of a national reseller and the flexibility of a specialized engineering firm. Our integrated account management and engineering approach ensure we are driving solutions that meet our customers' business needs. Our value is to simplify the adoption of technology for our clients, making technology a business enabler, not an inhibitor.

Diversity in the supply chain

As a woman and minority owned business, En Pointe IT Solutions is certified nationally by the Southern California Minority Supplier Development Council as a Minority Business Enterprise (MBE), the Women's Business Enterprise National Council (WBENC) and through the Supplier Clearinghouse for the supplier diversity program of the California Public Utilities Commission.

The En Pointe brand has a rich history as one of the most successful independent national IT Solution and Software Providers in the U.S. earning numerous awards and elite certifications. In March of 2016, Fiddy Hakim formed the new En Pointe IT Solutions to service a gap in the market, providing new opportunities for those seeking alternatives in a rapidly maturing industry.

Under her leadership as CEO, En Pointe IT Solutions has become one of the fasting growing independent IT resellers. Fiddy has a long and successful history as an entrepreneur and as an active leader in the minority communities where she has lived and worked. Through En Pointe IT Solutions, Fiddy is able to make a real impact by providing clients with meaningful choices in the technology space while accelerating diversity in the supply chain.

En Pointe IT Solutions strives to be your technology business partner and we only succeed when you achieve your technology goals.

Making Technology Work For You

En Pointe IT Solutions goes beyond hardware and software by offering a full portfolio of services that are built on industry standard ITIL processes and are adaptable to your changing business requirements. In conjunction with alliance partners, we have access to over 1000 engineers and project managers, all of whom are focused on identifying, designing, configuring, deploying and managing your technological needs, from recovering assets to hosting your data center.

The best technology solutions, every day.

HARDWARE

Connecting you with the right technology solutions is what En Pointe IT Solutions does best. With more than 300,000 products to choose from, it's easy to solve your technical challenges. From a single thumb drive to the scale of a hybrid data center, connected securely across an enterprise network infrastructure, En Pointe IT Solutions offers a robust catalog of products and technology to supply your organization with the market leading products, solutions and services you need.

SOFTWARE

Selecting the right software solution has become even more critical in solving business objectives. With En Pointe IT Solutions, you gain access to a comprehensive list of software titles and licensing options. We help you understand the complex world of volume licensing through analysis, consultation, and developing a customized solution. Clients leverage our extensive software knowledge to obtain solutions best suited for their needs.

En Pointe IT Solutions provides an eProcurement interface that allows you to purchase products daily, directly from our inventory. You can select from your customized catalog, implement your own work flow rules and enable P card purchases. Your IT procurement challenges will disappear with features like real-time inventory, order tracking, and many others.

SERVICES

At En Pointe IT Solutions, it's about more than just procuring and delivering products. En Pointe IT Solutions aims to be your partner in every way — from designing, delivering, deployment and managing your IT environment. Focus on your business and let En Pointe IT Solutions focus on making technology work for your needs. En Pointe IT Solutions has a complete portfolio of services from end point, to data center, to the hybrid cloud.
