

En Pointe ITS Storage Cost Savings Opportunity

THE PROBLEM

- Shifting from on premise to cloud storage.
- Capacity requirements increase quarterly / annually.
- Inflation **+20%** since 2020
- Increasing Infrastructure Costs
- Unoptimized Environments
- Outdated Reference Architecture

THE SOLUTION

Proprietary policy-based intelligence to move data between tiers of storage

- Enhance tier 1 storage utilizing cost effective tiered storage
- Serverless compute
- No application impact or data migration
- No application impact or application awareness
- Advanced AI for finding and destroying ransomware attacks
- Multi-Cloud and Multi-Hypervisor compatibility

THE BENEFITS & THE GOAL

Benefits

- Save up to 80% on storage spend
- Provide up to 50% optimization of current infrastructure
- AWS - 80% to 83% Savings
- Data Center - 92% Savings
- Azure - 90% Savings
- Zero cost proof of concepts
- New reference architecture

Goal

- Minimize the effects of Inflation on you and your customers
