

SECURITY MANAGED SERVICES

24/7/365 PROTECTION BY EN POINTE ITS

» STAY AHEAD OF HACKERS

Each year, cybercrime causes billions of dollars in damages and lost profits for businesses of all sizes. From SMBs to enterprises, there are no companies immune to cyber threats. And protecting an organization often includes in-house security operations monitoring and management that consumes space, time and budget —assets business of all sizes find in short supply.

Security Managed Services (SMS) is one of the fastest growing solutions today. There are many reasons why security solutions are growing at compounded growth rates and predicted to continue for the foreseeable future.

- ▶ Security Staffing Scarcity and Turnover
- ▶ Budget shortages vs SOC Needs
- ▶ One Size Does Not Fit All: Customized SMS Needs
- ▶ Evolving compliance reporting requirements
- ▶ Data Processing Expansion to Cloud, Hybrid Data Centers and IOT

En Pointe ITS Security Managed Services program relieves you of the burden that comes with managing your IT security. We provide a wide range of Security Managed Services, including:

- ▶ Security Monitoring
- ▶ DDoS Protection
- ▶ Incident Response
- ▶ Security Threat Management
- ▶ Governance Compliance Management
- ▶ Real-time Vulnerability Scanning

» ALWAYS-ON. ALWAYS SECURE.

You can reduce your security spend and maintain trust in your organization by contacting your En Pointe ITS Security representative. They'll walk you through the process and collaborate with you to design a policy that's tailored for your business.

To avoid the pitfalls of security management, you can transfer the work to En Pointe ITS Security through our Security Managed Services Program, utilizing trusted technologies, partners and processes. Our approach allows for truly versatile, round-the-clock monitoring, logging and reporting where nothing goes under the radar.

» BEST OF BREED SECURITY

Security Managed Services through En Pointe ITS Security are built around an advanced platform that's user friendly. With our SMS Program, you have an end-to-end information security management platform that's self-learning. Our automated monitoring system mines the data it collects for patterns to determine where threats may arise and then alerts our analysts who interpret the information. This prevents you from dealing with false alarms and wasting time on dead-ends that ultimately don't benefit your business. The reporting is documented and relayed in an orderly and reliable way, so you always remain informed about your IT assets.

» BENEFITS OF SMS

Our Security Managed Services are customizable and designed to address your business's needs. Aside from reducing the stress of cyber threats, they offer the following benefits:

- ▶ Around-the-clock security threat monitoring and management service at a fraction of the cost of an internal SOC
- ▶ Effective notification and incident response management in case of cyber threat exposure
- ▶ Facilitated compliance with most government regulations or industry standards, such as PCI, DSS, HIPAA, NIST, and GLBA

» SERVICES MODEL

The En Pointe ITS security SMS model covers every element of threat protection and can be customized to secure your business, including:

- ▶ Real-time threat monitoring
- ▶ Log Monitoring and Correlation and/or Intrusion Detection
- ▶ In-house and/or Third party services
